June 2021

An EUL Transportation website featuring news updates, the bus schedules and a live gps tracking system.
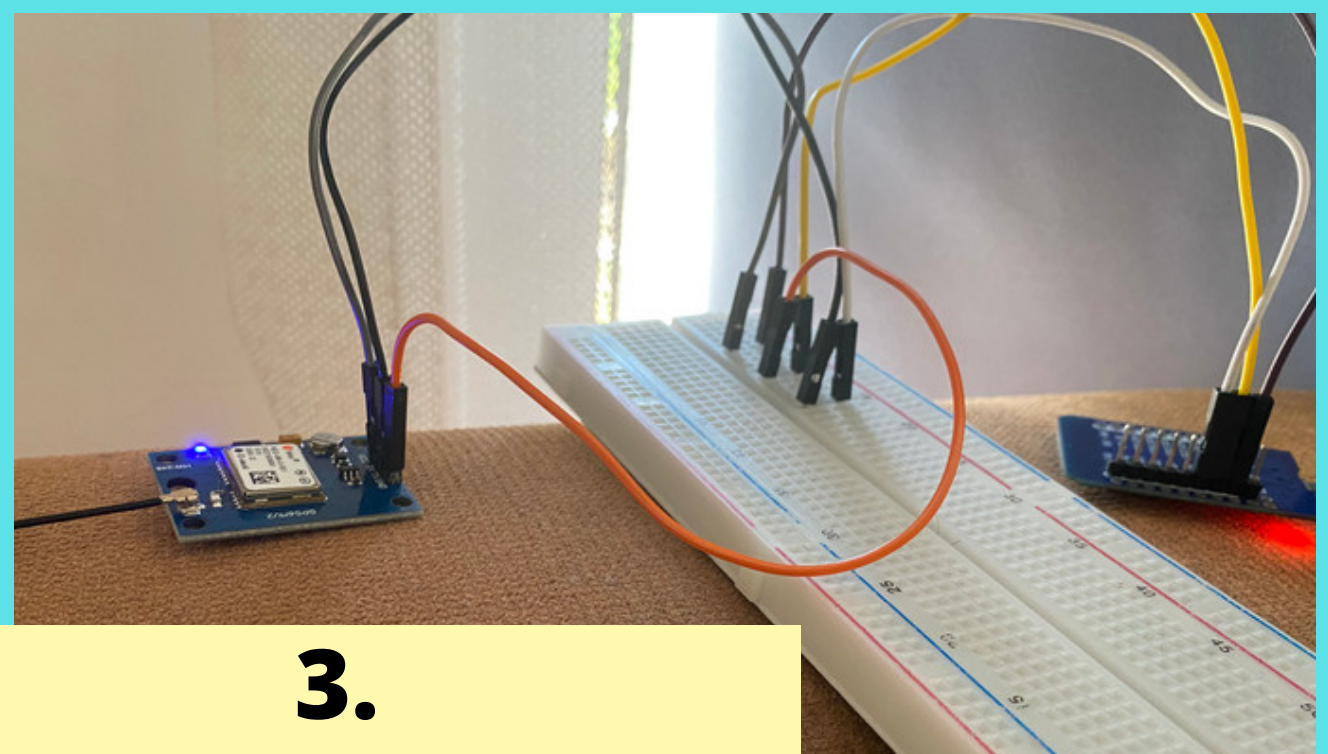

2.
Users can follow the bus movement enabled by our gps tracking system

1.

- On our pages, user are able to view announcements
- Users can also communicate with the administration.

3.
Material used:
- Xampp (Php, MySql)
- HTML, CSS, Javascript
- ESP32 Dev board
- Gps module

- This project aims to improve student life on campus.
- The website will have daily news updates and important announcements.
- in the future i would like to include a seat counter to notify the driver and the students when the bus is full.
